

ZOLOMON KALISER

Medical Device Market Research · Financial Modeling · Product Verification

College Station, Texas | zolomon.kaliser@tamu.edu | zolomon-kaliser.com | linkedin.com/in/zolomonkaliser

Biomedical engineering master's candidate with a completed finance degree, working where medical device engineering meets commercial decision-making. Market sizing, pricing, and competitive analysis on one side; inspection, verification testing, and design iteration on implantable hardware on the other.

PRACTICE

Independent Consulting — Principal

2026 – Present

Medtech market research and financial modeling

- Market sizing (TAM, SAM, SOM), pricing analysis, competitive landscape mapping, and barrier-to-entry assessment for early-stage medical device companies.
- Revenue, COGS, and operating expense models built to support pricing, planning, and investor-facing decisions.

EXPERIENCE

Teliatry, Inc. — Engineering Intern

May – Aug 2026

Richardson, Texas · Implantable neurostimulation systems

- Built the market analysis supporting pricing and planning, covering total, serviceable, and obtainable market, fair pricing, barriers to entry, and customer segmentation.
- Completed environmental temperature and humidity testing on more than one hundred implantable units, and ran incoming inspection on coils, circuit boards, and silicone components using digital microscopy and multimeter checks.
- Redesigned and fabricated the shipping package for implants and accessories across nine in-house revisions, from first concept to a production-ready configuration.

Resilient Healthcare — Software Testing Intern

May – Aug 2026

Lewisville, Texas · Clinical care platform · Reporting to the CBO/CIO

- Executed test passes against a clinical care platform, documenting outcomes and reproduction detail for engineering follow-up.
- Reported directly to the CBO/CIO, translating testing results into issue reports readable by technical and business stakeholders.

SageSpectra — Business Development Associate

Aug 2025 – May 2026

College Station, Texas

- Analyzed medical device markets, patient needs, and competitor positioning to guide corporate strategy and product direction.
- Constructed financial models projecting revenue, COGS, and operating expense for new medical technologies.
- Assessed device functionality and clinical application to support development decisions.

Allied Professionals' Insurance Services — Finance & Accounting Intern

Jan – May 2023

Frisco, Texas

- Reconciled bond portfolios and rebuilt Excel workflows to streamline data transfers and improve reporting accuracy for portfolio managers.

EDUCATION

Texas A&M University — Master of Engineering, Biomedical Engineering

Aug 2024 – May 2027

College Station, Texas · GPA 3.50

The University of Texas at Dallas — B.S. Finance

Aug 2020 – Aug 2024

Richardson, Texas · GPA 3.40

SELECTED GRADUATE WORK

Surgical Instrumentation Market Case Study. Competitive landscape and market research on a specialized surgical device, examining adoption drivers, financial trends, and sterilization economics.

Addiction Prevention & Recovery Device. Prototype design requirements for continuous patient monitoring, developed from patient feedback and clinical efficacy data.

CAPABILITIES

Commercial. Market sizing and forecasting, pricing analysis, competitive landscape, customer segmentation, financial modeling, advanced Excel.

Technical. Inspection and dimensional metrology, digital microscopy, continuity testing, environmental testing, packaging design and fabrication, software test execution, SOLIDWORKS.

Certifications. SOLIDWORKS Simulation for FEA (LinkedIn Learning); Introductory Human Physiology (Duke / Coursera). Member, MENSA.
