EDUCATION

Texas A&M University

Master of Engineering, Biomedical Engineering | GPA: 3.50

College Station, TX

Aug. 2024 – May 2027

The University of Texas at Dallas

Bachelor of Science, Finance | GPA: 3.40

Richardson, TX

Aug. 2020 – Aug. 2024

EXPERIENCE

ZKK Consulting

Founder & Principal Consultant

College Station, TX

Aug. 2026 – Present

- Founded and operate an independent consulting practice focused on engineering and biomedical engineering clients, delivering market research, financial modeling, and competitive analysis, and owning scoping, pricing, delivery, and client communication end to end.
- Generated \$15K in revenue within the first two months of operation with no paid marketing, converting inbound engagements and structuring each around defined deliverables and payment milestones.
- Built the commercial infrastructure from scratch, including the medical device and engineering service offering, MSA / SOW / NDA contract structure, client intake process, and the firm website launched in Aug. 2026.

Teliatry, Inc.

Engineering Intern, Implantable Neurostimulation Devices

Richardson, TX

May 2026 – Aug. 2026

- Built the market analysis supporting pricing and planning decisions for an implantable neurostimulation product, sizing TAM / SAM / SOM and defining customer segments, barriers to entry, and fair pricing.
- Defended the assumptions behind the analysis to company leadership, sourcing from public industry and veterinary market data in the absence of purchased research.
- Ran timing studies converting hands-on inspection steps into cost and capacity inputs for production planning, and completed environmental verification and incoming inspection on implantable units and purchased components.

SageSpectra

Business Development Associate

College Station, TX

Aug. 2025 – May 2026

- Analyzed medical device markets, unmet patient needs, and competitor landscapes to guide corporate strategy and product direction.
- Constructed financial models projecting revenue, COGS, and operating expense for new medical technologies under multiple adoption scenarios, connecting technical capability to commercial positioning.

Resilient Healthcare

Software Testing Intern, Quality Assurance

Lewisville, TX

May 2026 – Aug. 2026

- Validated web and mobile releases of a clinical care platform across administrator, clinical staff, hospital, and enterprise roles, developing a working view of how each stakeholder uses the product.
- Tested end-to-end clinical workflows and third-party integrations, building test patient records and clinician-facing protocol templates for feature validation.

Allied Professionals' Insurance Services

Finance and Accounting Intern

Frisco, TX

Jan. 2023 – May 2023

- Reconciled bond portfolios, built Excel processes to streamline data transfers, and analyzed large datasets to inform portfolio managers' investment strategies.

SELECTED PROJECTS

Biomedical Device Case Study, Surgical Instrumentation

Jan. 2025 – Aug. 2025

- Conducted market research and competitive landscape analysis for a specialized surgical device, evaluating adoption drivers, financial trends, and clinical factors including sterilization impact.

Post-Kidney-Transplant Remote Patient Monitoring

Jan. 2026 – May 2026

- Evaluated remote monitoring strategies and digital health solutions to reduce in-person follow-up burden and improve post-transplant outcomes.

SKILLS & CERTIFICATIONS

Commercial & Analytical: Medical device market research, TAM / SAM / SOM sizing, competitive landscape analysis, pricing analysis, market forecasting, financial modeling (revenue, COGS, opex), customer segmentation, barriers-to-entry assessment, client engagement scoping

Technical & Tools: Microsoft Excel (VLOOKUP, pivot tables), financial projection software, SOLIDWORKS, device inspection and verification methods, clinical workflow and software validation

Certifications & Affiliations: SOLIDWORKS: Simulation for Finite Element Analysis (LinkedIn Learning); Introductory Human Physiology (Duke University / Coursera); MENSA (since 2010)
